% Skills

- PYTHON
- JAVA
- Programming in C
- HTML
- Web development
- Canvas editor (or) Designer

% Projects

- Voice Assistant
This project is interaction between human and computer in voice control (or) voice assistant. We can speak some content the assistant is run and output is what you asked that is executed. Example: open Google, open You Tube, Instagram, What Apps, NEWS and interact with some content HI, Hello etc...
- Smart vehicle battery
 1. The SMART Vehicle Battery project enhances lithium-ion battery efficiency in electric bikes by integrating a smart grid system and Arduino programming.
 2. The project addresses key issues such as overheating, inefficient energy usage, and short battery lifespan.
 3. A smart grid system alternates between two batteries, ensuring balanced energy consumption and minimizing heat.
 4. An Arduino microcontroller monitors charge levels, providing real-time data to optimize battery performance.
 5. By stabilizing energy output, the system extends travel range and reduces the need for frequent charging.
 6. Results show improved charging speed, lower heat generation, and increased reliability for daily use.

% Interests

- Create a website
- Innovative solutions
- Creative ideas
- Learning real time problem and idea solutions

% Activities

- Reading books
- Problem solver
- Idea builder

% Languages

- Tamil (fluently)
- English (intermediate)
